

Eli Grin

Data Scientist | Generative AI | Machine Learning | Azure | NLP

+353 85 264 9855 | Dublin, Ireland | ilia.grishkin93@gmail.com | github.com/replicant34

PROFESSIONAL SUMMARY

Data Scientist with **10 years** of experience building and deploying scalable AI/ML solutions in production environments. Proven ability to lead full project lifecycles from data ingestion to deployment across retail and SaaS domains. Skilled in Generative AI (LLMs, embeddings), time series forecasting, recommendation systems, and cloud-native ML solutions using AWS. Passionate about applying advanced analytics to solve real-world business challenges.

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, JavaScript, PHP, HTML/CSS

Frameworks & Libraries: PyTorch, TensorFlow, Hugging Face, scikit-learn, Pandas, NumPy, Spark

Cloud & MLOps: Azure, Heroku, Docker, Kubernetes, CI/CD, Airflow

Databases & Storage: PostgreSQL, MySQL, MongoDB

Machine Learning & AI: LLMs, RAG, Transformers, Diffusion Models, Time Series Forecasting, Clustering, Recommendation Systems, Classification, Regression, Computer Vision

Tools & Visualization: Git, Tableau, Google Looker

PROFESSIONAL EXPERIENCE

AI/ML Specialist - POS Integration Project

“Data Devises” | Dulin, Ireland | Project | September 2023 - March 2024

Designed and integrated ML solutions into a custom POS for a multi-site restaurant chain, aligning AI systems with business operations.

Responsibilities and Achievements:

- Developed and deployed a Python-based hybrid recommendation engine (collaborative + content-based) that increased customer engagement across 10+ restaurant locations.
- Built and productionised time-series demand-forecasting models (ARIMA & Holts Winters) to predict daily demand.

Senior Data Scientist

“Renna Group” | Moscow, Russia | Full-time | September 2015- September 2021

Drove data-driven growth during the company’s expansion from 0 to 50+ retail stores, serving a region of 12M+ people.

Responsibilities and Achievements:

- Developed a recommendation engine and discount system, increasing sales by 15% through personalisation.
- Achieved 92% accuracy in store revenue forecasting using internal and external data sources.
- Designed and implemented an automated stock ordering system (ARIMA, Holt-Winters), saving 8,000+ work hours annually and improving inventory reliability by 20%.
- Conducted site selection analytics using demographic, traffic, and competitor data; created 5-year revenue projections and investment models.
- Managed operations using SQL, Python, clustering, and Excel-based analysis tools.

Junior Data Analyst

LLC “Escalada Industry” | Moscow, Russia | Full-time | November 2012 - May 2015

Joined as an intern in tourism analytics and was promoted to manage group operations.

Responsibilities and Achievements:

- Created and managed a unified operational database of suppliers, staff, and resources, streamlining cost tracking and supplier comparisons.
- Designed tour packages and marketing strategies based on profitability analysis.
- Identified operational inefficiencies that led to a 15% reduction in costs.

EDUCATION

Higher National Diploma in Data Analytics for Business

CCT College Dublin, Ireland, 2024-2025 (*Completed*)

- Graduating top of class, selected as student mentor for peer academic support.
- Coursework: SQL, Python, Machine Learning, Statistics, Data Visualisation
- Key Projects: Developing and implementing recommendation engine for online retail,
Predicting Olympic Athletes Success and Exploring Traits with Machine Learning,
Investment Opportunities in Irish Tourism: A Geospatial and Market Forecast Analysis,
Maximising Resource Utilisation: Machine Learning for Hospital Efficiency Improvement.

MSc in Social Research & Analytics (*Scholarship Awardee*)

State University, Moscow, 2015-2017

- Received full academic scholarship and research grant for master's thesis.
- Thesis: Morphofunctional Traits of Elite Athletes in Sports
- Focus: Conducted quantitative analysis of physiological and morphological characteristics in high-performing athletes. Identified statistical correlations between genetic markers and optimal performance in specific sports disciplines.

BSc in Environmental Systems and Tourism Analytics (*Scholarship Awardee*)

State University, Moscow, 2011 – 2015

- Emphasis on statistics, GIS, environmental data, and field research methods.
- Final project: Impact assessment of eco-tourism using multivariate analysis.

CERTIFICATES

- **Microsoft Certified: Microsoft Azure (AZ-900)**

Microsoft – 2024

Fundamentals of cloud services, Azure architecture, and data solutions.

- **IBM Data Science Specialisation**

IBM – 2022

Covered Python, SQL, data analysis, machine learning, and data visualisation.

- **Google Data Analytics Specialisation**

Google – 2022

Focused on data wrangling, visualisation (Sheets, Tableau), and business insights.

- **Architecting with Google Kubernetes Engine**

Google Cloud – 2025

Cloud-native solutions using Kubernetes, container orchestration, and GCP architecture.

- **Large Language Model Operations (LLMOps)**

Duke University - 2025

Deploying, managing, and optimising large language models across various platforms including Azure, AWS, Databricks, local infrastructure.
